SHEET METAL INDUSTRIES

January to December 1978

INDEX TO VOLUME 55

A

A new approach to punch press design 924
A review of galvanizing in the 19th century 889
A service vital to industry 874
A watchword needed (Annual Review) Environment and legislation 897
All about finishing first 864
All that glitters is not what you were sold 1126
Aluminium alloy sheet. Biaxial stress testing of ultra fine grain 687
Aluminium and steel sheets. A comparison of the formability of 703
Aluminium anodising. Developments in techniques for 722
Aluminium at elevated temperatures, strain and strain-rate hardening effects on punch stretching of 5182–0 1208
Aluminium in the transatlantic balloon project – The AALCO capsule 699
Aluminium products. The problem of bad shape in 700
Aluminium sheet. Die forming approximations for 1015
Aluminium soldering 792
Another look at high duty iron castings in power press construction 432
Application of CNC control to the metalforming process 146
Application of stud welding techniques 787
Appreciating the significance of surfaces 929
Arc welding equipment. Improved production 768
Austenitic chrome-nickel steel. Shear and flow forming of 12
Austenitic stainless-steel sheets. Work-hardening and formability of 598
Australian press shops. Use of grid strain analysis for die development and process control in 451
Automatic MIG welding speeds container production 800
Automatic presses for improved press shop operation 342
Axially uniform tube bulging 1192

B

BA2 – The universal cold work steel 1007
Biaxial stress testing of ultra fine grain aluminium alloy sheet 687
Blankholding action of draw beads 984
Blech 78, highlights of 1093
Book Reviews: Mechanics of Materials 40
Sheet Metal Industries Year Book 145
Art and technology of pressing 364
Scrap metal processing 698
Kempe's Engineers' year book 784
Building dies for quick maintenance and low cost 1039
Bulge forming process. Development of a 623

C

Can formation by impact extrusion 714
Can making industry. New tinplate facility to serve 1043
Can sheet metal operators afford to ignore nc? 173
CNC control to the metalforming process. Application of 146
Closer tolerance re-usable punching system 1011
CNC. Determining press-brake bend angle by 340
CNC, production receives more punch with 1136
CO_2 Laser-Laboratory instrument to machine tool. The 942
Cold rolled sheet for deep drawing. High strength 180
Cold rolled strip for a more demanding market. Producing 82
Company history reflects increasing usage of stainless steel over 50 years 36
Comment
An answer required? 11
Bumping the dumping 132
Prevenience 236
Concerning Ourselves 426
Metalworking 78 587
Lighten the darkness 686
The Chain Complete 767
Down Memory Lane 863
The old, old story 971
We can manage! 1075
We've said it before/No 'death ray' 1179
Comparison of the formability of aluminium and steel sheets. A 703
Computer controlled punch presses 518
Computerization comes to shearing 465
Cost benefits of pre-finished sheet steels 88
Current development in resistance welding at the Welding Institute 796

D

Deep drawing and ironing. Tooling for 990
Deep-drawing sheet by warm-rolling, manufacture of – Part II 1234
Design and manufacture of patterns, moulds and dies 612
Designing for price and performance 498
Determining optimum punch to die clearance 334
Determining press-brake bend angle by CNC 340
Development of a bulge forming process 623
Development of a quantative sheet galling test – Part 1 827
Development of hydraulically operated piercing tools in industry 1141
Development of NC in the sheet metal industry. The 618
Developments in punching presses 1146
Developments in stainless steelmaking 32
Developments in techniques for aluminium anodising 722
Developments in the welding of stainless steels 28
Die Clinic: Punch point breakage 946
Punching stainless steel problem 1233
Die forming approximations for aluminium sheet 1015
Differential system for continuous stretch levelling. A. 1120
Draw beads. The blankholding action of 984

E

Elastic suspension of machines 505
Electrocoating of iron, zinc and manganese phosphates on to steel 642
Electronics in press-brake operations 1304
End welding in continuous metal strip/processing. Importance of satisfactory 808
Epoxy resins and polyurethanes. Tooling with plastics, 997

European Power Press Manufacturers' Panel 427

F

Factors influencing the forming-limit curves of sheet steel 631
Finishing first. All about 864
Formability Fundamentals 1180
Four hundred panels an hour on automatic line 938

G

Galvanizing in the 19th century. A review of 889
Gang mounting multiple punching units 1137
Gloom today, but an optimistic tomorrow for aluminium producers 813
Grid strain analysis for die development and process control in Australia press shops. Use of 451

H

High performance screw recess improves productivity 513
High strength cold rolled sheet for deep drawing 180
High strength formable steels. Saving money with – Part 2 524
Higher productivity – Britain's first priority 906
Hydraulic 'nuts' – their uses and advantages 619
Hydraulically operated piercing tools in industry. Development of 1141

I

IDDRG 10th Biennial Congress Twenty years of research and development in sheet metal forming and formability testing 740
Impact extrusion. Can formation by 714
Importance of satisfactory end welding in continuous metal strip/processing 808
Importance of welding fume disposal in relation to Health and Safety regulations 795
Improved production of arc welding equipment 768
Improving the quality control of resistance welding 812
Influence of tinplate variables on the D and I canmaking process 1076
Institute of Sheet Metal Engineering 100, 209, 362, 517, 650, 739, 834, 949, 1050, 1149, 1246, 1300
Iron castings in power press construction. Another look at high duty 432
Iron, zinc and manganese phosphates on to steel. Electrocoating of 642

L

Laser beam inspection of strip-metal surface finish 1230
Laser-Laboratory instrument to machine tool. The CO_2 942
Letters to the Editor 96, 99, 339

M

Machine tools. Sheet metal construction for
Part 1 608
Part 2 733
Manufacture and testing of exhaust systems in stainless steel 15
Manufacture of deep-drawing sheet by warm-rolling – Part II 1234
Manufacture of one piece sheet metal V-belt pulleys with up to three grooves 441
Materials and techniques, Polishing and buffing Part 1 1199
Metal strip, the state of the art, shape in 1222
Metalworking 78 5, 124, 228, 416
Metalworking 78 Exhibition Preview 239
Metalworking 78 Review 588
Micro-welding of thin sheet components 772
MIG welding speeds container Production. Automatic 800
MIG welding. Thin aluminium wire used for 726
Mild steel sheet. Production and formability of high-strength low-carbon – Part 2 199
Modern approach to stainless-steel stockholding. A. 24
More efficient oil application on cold rolled strip mill 92
Motor car silencers. Trends in the automatic production of 346
Multi-drilling machine makes 36 holes in a single pass 1232

N

NASS – Reliability, respectability, integrity 881
NC – Can the sub-contractor help customer justification? 164
NC in sheet metal working – Part 1 934
Part 2 1034
NC for sheet metal forming tools 972
NC in the sheet metal industry. The development of 618
NC line improves output at Hereford 179
NC tapes. Producing error-free 154
NC to plan for future growth. Using 940
New slitting line improves productivity and safety 482
New tinplate facility to serve can making industry 1043
Noise – a pressing problem? 900
Noise characteristics, punch press 1131
Numerical control aids toolmaking 1004
Numerical control and programming of pressbrakes 134
1978 – Numerical control or bust! 178
Numerical control tapes. Preparation and verification of 446
Numerically controlled sheetmetal – working machines 158

P

Panel-making line. Special automatic 731
Panels an hour on automatic line. Four hundred 938
Patterns, moulds and dies. Design and manufacture of 612
PEP '78 – Production Engineering and Productivity 1026
Plastics, epoxy resins and polyurethanes. Tooling with 997
Pneumatic TC (template controlled) backstop 1036
Polishing and buffing materials and techniques Part 1 1199
Pollution and scepticism from the welding operation. Removing 779
Pre-finished sheet steels. Cost benefits of 88
Preparation and verification of numerical control tapes 446
Press with only one moving part, three ton electronic 1219
Press-brake bend angle by CNC. Determining 340
Press-brake operations. Electronics in 1304
Press-brakes. Numerical control and programming of 134
Press shop operation. Automatic presses for improved 342
Problem of bad shape in aluminium products. The 700
Producing cold rolled strip for a more demanding market 82
Producing error-free nc tapes 154
Production and formability of high-strength low-carbon mild steel sheet– Part 2 199
Production receives more punch with CNC 1136
Profitable short-run stampings 1089
Punch press design. A new approach to 924
Punch press noise characteristics 1131
Punch presses, Computer controlled 518
Punch to die clearance. Determining optimum 334
Punching presses, Developments in 1146
Punching system. A closer tolerance re-usable 1011
Punching units, gang mounting multiple 1137

Q

Quick change tooling improves press-shop efficiency 477
Quick maintenance and low cost. Building dies for 1039

R

Rapid solvent dewatering and drying units 627
Regional development. Wales, Scotland, Yorkshire & Humberside. A moving experience? 912
Removing pollution and scepticism from the welding operation 779
Resistance welding at the Welding Institute. Current development in 796
Resistance welding. Improving the the quality control of 812
Rolling process. Special slide rules and nomographs for the 191

S

Saving costs with new tooling materials 489
Saving money with high strength formable steels – Part 2 524
Screw recess improves productivity. High performance 513
Service vital to industry. A 874
Servicing the stainless steel user 43
Shape in metal strip, the state of the art 1222
Shear and flow forming of austenitic chrome-nickel steel 12

Sheet galling test. Development of a quantative – Part 1 827
Sheet metal construction for machine tools – Part 1 608
Part 2 733
Sheet Metal News 7, 127, 231, 418, 581, 681, 761, 857, 965, 1069, 1173
Sheet metal operators afford to ignore nc? Can 173
Sheet Metal Plant & Equipment 105, 219, 370, 555, 664, 744, 843, 952, 1058, 1159, 1253, 1296
Sheet metal forming tools. NC for 972
Sheet metal working – Part 2. NC in 1034
Part 1 934
Sheet metal-working machines. Numerically controlled 158
Sheet steel suitable for making the part 815
Slitting line improves productivity and safety. New 482
Soldering, aluminium 792
Some regional developments for industry:
Wales 914
Scotland 919
Yorkshire & Humberside 922
Special automatic panel-making line 731
Special slide rules and nomographs for the rolling process 191
Spot and projection welding quality assurance 781
Stainless Steel Fabricators' Association 46
Stainless steel. Manufacture and testing of exhaust systems in 15
Stainless steel over 50 years. Company history reflects increasing usage of 36
Stainless steel problem, Die clinic – Punching 1233
Stainless steel production and processing in Sheffield 816
Stainless-steel stockholding. A modern approach to 24
Stainless steelmaking. Developments in 32
Stampings, Profitable short-run 1089
Steel rule dies. Taking a new look at 469
Stockholding & Service Centre News and Equipment 111, 214, 543, 660, 747, 840, 951, 1052, 1152, 1256, 1290
Strain and strain-rate hardening effects on punch stretching of 5182–0 aluminium at elevated temperatures 1208
Strain-measurement system for sheet-metal forming. A 653
Stretch levelling. A differential system for continuous 1120
Strip-metal surface finish, laser beam inspection of 1230
Stud welding techniques. Application of 787
Subcon Exhibition. Subcontracting services for industry 355
Sub-contractor help customer justification? NC – Can the 164
Superior surfacing techniques aids hot mill performance 350
Superplastic forming of Supral aluminium alloys 696
Supral aluminium alloys. Superplastic forming of 696
Surfaces. Appreciating the significance of 929
Surfacing technique aids hot mill performance. Superior. 350
Suspension of machines. Elastic 505

T

Taking a new look at steel rule dies (template controlled) backstop. Pneumatic TC 469 1036
Thin aluminium wire used for MIG welding 726
Thin sheet components. Micro-welding of 772
Three ton electronic press with only one moving part 1219
Tinplate variables on the D and I can making process, Influence of 1076
Tooling for deep drawing and ironing 990
Tooling with plastics, epoxy resins and polyurethanes 997
Toolmaking. Numerical control aids to 1004
Tooling improves press-shop efficiency. Quick change 477
Tooling materials. Saving costs with new 489
Transatlantic balloon project – the AALCO capsule. Aluminium in the 699
Trends in the automatic production of motor car silencers 346
Tube bulging, axially uniform 1192

U

Universal cold work steel. BA2 – The 1007
Use of grid strain analysis for die development and process control in Australian press shops 451
Using NC to plan for future growth 940

V

V-belt pulleys with up to three grooves. Manufacture of one piece sheet metal 441

W

Welding fume disposal in relation to Health and Safety regulations. Importance of 795
Welding News and Equipment 109, 216, 367, 548, 670, 750, 846, 954, 1055, 1154, 1250, 1293
Welding of stainless steels. Developments in the 28
Welding operation. Removing pollution and scepticism from the 779
Welding quality assurance. Spot and projection 781
Work-hardening and formability of austenitic stainless steel sheets 598

Y

Your business at risk? 909

INTERNATIONAL INDEX

Developments in research into sheet-metal-forming processes in Japan – Part 1 by Kiyota Yoshida Institute of Physical and Chemical Research, Japan) and Yutaka Hayashi (Sumitomo Metal Industries, Japan) 8

Developments in the approach to improving safety regulations in Germany by Ludwig Leiseder 15

The importance of lubrication in sheet-metal forming by H T Coupland, BSc(Eng), PhD, CEng, FIMechE (Pyrene Chemical Services Ltd, UK) 20

Combining presswork safety and ergonomics with high productivity – An informed view from Sweden by Gunnar Garde (Director General, Swedish office of Safety and Health) 25

Satisfying the demands of industry for metal-forming machines by G W Mills (Chairman, The Press and Shear Machinery Co Ltd, UK) 29

Designing machines for the Third World by Norman Williams (Managing Director, Ductile Engineering Ltd, UK) 34

Deep drawing without blankholder on hydraulic single column presses by Dipl Ing Franz Brambauer, VEB Kombinat Umformtechnik 'Herbert Warnke', Erfurt, GDR 38

Reducing resistance-welding costs by the use of a fully-balanced mains loading by J C Clews (Technical Sales Manager, British Federal Welder and Machine Co Ltd, UK) 43

Numerical control of coil-processing lines 52

The manufacturer of sheet-metal-forming machines and equipment by C I Ridgway (Chairman, Metalforming Machinery Makers' Association, UK) 56

The Stainless-steel fabricator by David F Tiplady (Chairman, Stainless Steel Fabricators' Association, UK) 56

The Sheet-Metal former by J D Udal, MBE (President, Institute of Sheet Metal Engineering, UK) 56

The strip-mill stockholder processor by Ernest Barrett (President, National Association of Steel Stockholders, UK) 57

The producer and user of cold-rolled sections by M R Wallis (Chairman, Cold Rolled Sections Association, UK) 57

The contract press work by C S Joseph (Chairman, British Contract Presswork Association, UK) 58

The producer and user of non-ferrous metals by R D Johnston (Director BNF Metals Technology Centre, UK) 58

A plastic that acts like a metal by Harold Daniels (Consulting Editor, 'Metal Stamping', USA) 59

Large transfer press produces torque-converter components 64

Modern sheet-metal-working practice and the effects of micro-electronics by M C P Hewitt, BSc (Eng), CEng, FIMechE, FIEE, FIProdE (President, British Numerical Control Society) 65

Cutting and stacking lines for hot- and cold-rolled materials from coil by Eberhart Bald (Graduate Engineer, Maschinenfabrik Heinrich Georg, West Germany) 66

The development of corrosion-resistant composite zinc-coated steel sheet by Takeshi Adaniya (Nippon Kokan KK, Japan) 73

Channels – Traditions – Services by Dr Hans Koenig (Dr-Ing Koenig AG, Switzerland) 80

Progress in sheet-metal-forming in Czechoslovakia by Jiri Tomasek 84

The history of deep drawing stainless-steel sink bowls by P E May (Technical Manager, W and G Sissons Ltd, UK) 89
